

Drainage Board Meeting

April 3rd, 2012

Present: Al Logsdon, David Gogel, Mickey Toler, Stanley Herron, Elaine Jones, Dan Wilkinson, Jane Lynam

Meeting was called to order by Chairman, Al Logsdon at 11:30 A.M.

MINUTES

Minutes from 3-8-12, correction, Sweezer Ditch, Herron estimated, it should say estimate.

Motion to approve minutes of the April 3 Drainage Board with that correction was made by Toler, seconded by Gogel, motion passed.

SURVEYOR REPORT

GARRETT CREEK

Herron reported that work had started on Garrett Creek, taking out debris, probably next week they would get a long reach in there to start digging.

SWEEZER CREEK

On Sweezer the bid that was let out was so much per foot. They had not been able to contact Vectren and the farmer that owns the ground would prefer to wait until fall because it is getting so late. It was decided to put this project on hold until fall; and it will have to be re-bid.

SPRAYING

They are getting ready to start spraying, he held off as long as possible hoping that everything would turn green before he started. A couple of ditches they are having trouble with, but are going to try a different chemical. Will be buying chemicals from the Co-op this year due to billing problems incurred last year.

LOG JAM

Another log jam has been reported, although Herron hasn't seen it yet, he has talked to the gentleman and is supposed to meet him by the end of the week. Surveyor will look at it and bring the information back to the Board. Gogel ask the location and Herron said it was off of Base Road, a lateral off of Pigeon Creek. Water is running out around the jam into the field.

DRAINAGE PROBLEM

Toler reported a problem at the intersection of CR 500W & 500N; go north on 500W; Miller Boys farm; they have dug a ditch from CR 500W, west until it meets the drainage that comes down in the trees. On the right hand side of the road the land is owned by Sarver, farmed by Lockridge, one area in there has been flooded out. Toler has talked to Painter to see if there is a culvert there. Painter will check on the problem.

OLD ST RD 66

Toler said he had received a call about Old St Rd 66, on the left hand side of old 66. People are using it as a dump site, there are approximately 150 old tires there. He wondered what, if anything, could be done. Logsdon stated he felt that this was a problem for Solid Waste instead of the Drainage Board.

Since there was no other business Gogel made a motion to adjourn. Toler seconded the motion, motion passed. Meeting was adjourned at 11:45 A.M.

President

Attest:

Donna Lynam, Auditor
